

## SUPER GLUE

### PRODUCT

Cyanoacrylate glue.

### APPLICATION

Intended for industrial application and tinkering. Basically applied for bonding smooth surface wood (no pores) such as: metal, glass, rubber and some plastics.

### PROPERTIES

- Short bonding time
- High mechanical durability of joints
- Easy application

### TECHNICAL DATA

| No | Inspected property | Requirements          |
|----|--------------------|-----------------------|
| 1. | form               | transparent liquid    |
| 2. | colour             | transparent           |
| 3. | density            | 1.1 g/cm <sup>3</sup> |
| 4. | Bonding time       | 5 s                   |

### INDICATIONS FOR APPLICATION

Apply glue on one of the surfaces glued and press both elements glue for approximately 5 seconds.

### STORAGE

Store in a dry, cool place. Protect from direct light and dampness. Guarantee period – 12 months. Storing in a fridge in temperature 4°C significantly extends the glue's durability. Do not leave the packages open.
