

SUPERADHESIVE

PRODUCT

Cyanoacrylate adhesive.

APPLICATION

Adhesive is intended for industrial application and tinkering, mainly for bonding wood and plain surface materials, like metal, glass, rubber and plastics.

PROPERTIES

- short bonding time
- high mechanically resistant joints
- easy application

TECHNICAL DATA

No.	Property under examination	Requirements
1.	physical state	transparent liquid
2.	colour	colourless
3.	density	1,1 g/cm ³
4.	bonding time	5 s

APPLICATION INFORMATION

Put adhesive on one of gluing surfaces and press down gluing elements for about 5 s.

STORING

Should be stored in original packaging, in dry and cool compartments up to 12 months. Keep away from light and moisture. Storing in refrigerator in temperature 4°C prolongs life of adhesive. Don't leave packaging open.
